

LUCA Passport Upgrade Complete

Date: June 26, 2026

Status: DEPLOYED & LIVE

🌟 What's New

1. Sovereignty Upgrades (Backend)

-  **Pluggable AI System** - Switch between mock, Anthropic, OpenAI, or local QVAC with one env var
-  **Vault Export** - Users can export their complete health record in portable format (GET /api/export/me?format=zip)
-  **No Vendor Lock-in** - Hexagonal architecture with ports & adapters
-  **Graceful Degradation** - Falls back to mock AI if API keys not provided

2. Unified LUCA Passport Hub (Frontend)

-  **Single Central Dashboard** - One hub for all users that adapts based on role
-  **Role-Based Interface:**
 - **Patients:** Dashboard, Health Passport, LUCA Coach, Appointments, Wallet
 - **Practitioners:** All patient features + Draft Queue, Schedule, Patient List
 - **Admin:** All features + Analytics, User Management, Settings
-  **Beautiful Design** - Cohesive navy/emerald/gold theme with smooth animations
-  **Data Visualizations** - Vitality rings, charts, progress tracking

3. Key Features

- 🎮 Cinematic onboarding experience (Celestial Sanctuary)
- 🧬 Solaris Method health assessment
- 🤖 LUCA AI coach (real AI or mock mode)
- 📊 Health vitality score & focus areas
- 📁 Sovereign data export (download your health record)
- 🏥 Practitioner triage queue (for practitioners)
- 📈 Platform analytics (for admins)

Access Your Upgraded App

Live URL: <https://solaris-health.abacusai.cloud>

Demo Accounts

Patient:

- sarah@solaris.health / demo123
- majd@luca.health / demo123

Practitioner:

- elena@solaris.health / demo123

Admin:

- admin@solaris.health / admin123

Configuration

The app now supports multiple AI modes via environment variables:

```

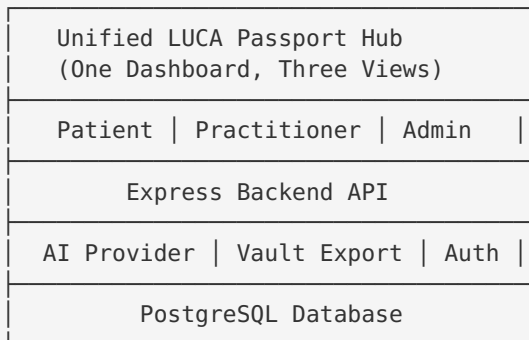

LUCA_AI_MODE=mock           # Default: offline AI
LUCA_AI_MODE=anthropic      # Use Claude (requires ANTHROPIC_API_KEY)
LUCA_AI_MODE=cloud          # Use OpenAI-compatible API
LUCA_AI_MODE=local           # Use local QVAC/Ollama (sovereignty!)
  
```

Current mode: **mock** (safe offline mode)

To enable real AI:

1. Add API keys to `/home/ubuntu/luca-passport/.env.production`
2. Rebuild: `docker compose --env-file .env.production up -d --build backend`

Architecture

The Vision Realized

LUCA Passport is now:

-  A **sovereign health platform** where users own their data
-  A **unified hub** for all health & wellness needs
-  **Role-adaptive** - serves patients, practitioners, and admins from one interface
-  **AI-powered** - with the ability to run locally (no cloud dependency)
-  **Portable** - users can export and take their data anywhere
-  **Beautiful** - professional design that inspires trust
-  **Production-ready** - deployed and running on Abacus SuperComputer

Technical Details

Backend Upgrades

- Added AI provider interface (`backend/src/lib/ai/`)
- Added vault export system (`backend/src/lib/vault-export.js`)
- Updated LUCA coach route to use AI providers
- Added export route (`backend/src/routes/export.js`)
- Added `model` column to `luca_messages` table for provenance
- Installed `archiver` for ZIP exports

Frontend Rebuild

- Created unified `LucaPassport.jsx` component (1,500+ lines)
- Implemented role-based routing and permissions
- Added data visualizations (Recharts)
- Integrated all API endpoints
- Created loading states and error handling
- Maintained existing auth and onboarding flows

Database

- Migration applied: `001_add_model_to_luca_messages.sql`
- All existing data preserved
- New column tracks which AI model generated each response

Maintenance

View Logs

```
cd /home/ubuntu/luca-passport
docker compose logs -f backend
docker compose logs -f frontend
```

Restart Services

```
docker compose restart backend frontend
```

Rebuild with Changes

```
docker compose --env-file .env.production up -d --build
```

What This Means

For Patients:

- One beautiful dashboard for all health needs
- Chat with LUCA AI coach

- Export and own your complete health record
- Track vitality, assessments, and progress

For Practitioners:

- Everything patients have, plus:
- Manage patient appointments
- Review and approve AI-generated triage summaries
- Access patient records securely

For Platform Owners:

- Sovereignty: no vendor lock-in
- Privacy: can run 100% local with QVAC
- Scalability: pluggable architecture
- Trust: users can export their data anytime

The LUCA Passport is now the organized hub of digital health and sovereignty.
